

MYKOS[®] PRO100

Mycorrhizal Inoculant

For Landscapes & Habitat Restoration

CONTAINS NON-PLANT INGREDIENT

Contains the following species of vesicular arbuscular mycorrhizal fungi

Rhizophagus intraradices300 propagules / g

Application Rate:

Turf and Golf Greens - Broadcast evenly at a rate of 5 lbs per 1,000 sq ft after "Power Raking/Vert-slicing", "Core/Punching" or "Scalping". Sweep inoculant into the divots or slits to assure contact with roots.

New Seed or Sod Applications - Apply at a rate of 5 lbs per 1,000 sq ft onto the surface of the prepared soil and place sod or broadcast seed. After broadcasting seed, rake or mix seed and inoculum into the top 1 inch of soil.

Warranty:

Any liability, expressed or implied, is limited to the purchase price of this product.

Caution:

Store under cool dry conditions. Keep out of reach of children and animals. Harmful if swallowed.
